Education

Ramrao Adik Institute of Technology May 2024
Bachelor of Technology in Information Technology (GPA: 8.3 / 10) *Navi Mumbai, Maharashtra*

- **Relevant Coursework:** Java Programming, Collection Framework, Data Structures and Algorithms, C++, Database Management System, Object Oriented Programming, Operating System, Information Security & Blockchain.

Vidyalankar Polytechnic August 2021
Diploma in Information Technology (Percentage: 84 / 100) *Mumbai, Maharashtra*

- **Relevant Coursework:** Java Programming, Collection Framework, C++, Data Structures, Database Management System, Object Oriented Programming.

Experience

Invisible Technologies Feb 2025 - Present
AI Data Trainer (Contract) Remote

- Contributing to Invisible Technologies' mission as a leading AI operating system for enterprises, supporting model. Training and fine-tuning large language models across diverse domains including programming languages (Java, Python, C++, SQL), technical workflows, and multilingual content (English, Hindi, Marathi) to ensure accurate and context-aware AI responses.
- Performing detailed quality assessments of AI-generated outputs, identifying errors, correcting guideline violations, and maintaining strict adherence to data quality standards for responsible AI development.

AI Coding & Data Trainer Dec 2023 - Dec 2024
Freelance/Contract Remote

- I have provided AI training and annotation expertise for prominent organizations in the AI sector, contributing to projects with Scale AI, Alignerr, and Pareto AI.
- I have trained advanced language models to handle a range of tasks, including programming (covering Java, Python, C++, and SQL), technical analysis, and multilingual contexts (English, Hindi, Marathi), as well as processing various media formats (text, image, audio) and task types.
- My role required the creation and execution of test cases, the development of robust code samples, and extensive code reviews across multiple programming languages to ensure both efficiency and accuracy.
- I have helped improve model performance by using reinforcement learning with human feedback (RLHF), which involves training the model to learn from human guidance and preferences to produce better and more accurate results.

Technical Skills

Preferred Programming Language: Java

Experienced: Java, C++, HTML, CSS, TypeScript, JavaScript, Collection Framework, Object-Oriented Programming, Data Structures & Algorithms, Databases, SQL.

Frameworks: Angular, Spring Boot, Spring Security, Spring MVC, Hibernate, Maven.

Tools and Testing: Visual Studio Code, IntelliJ IDEA, Postman, GitHub, Git.

Projects

JOB PORTAL WEB APPLICATION
Developed a job portal using **Java, Spring MVC, Thymeleaf** and **Spring Security** for user authentication and role management. Integrated **JPA** and **Hibernate** with **MySQL** for database operations, optimizing performance and ensuring a seamless user experience.

FACEMARK - A FACE ATTENDANCE APP
Designed and implemented a **Python** based face attendance application with **Firebase** backend, integrating face recognition for accurate attendance marking and seamless front-end/back-end performance.
